Experience

GitHub   Nov 2022
Open-Source Contribution
- Contributed to different open-source projects including effectively communicating with developers.

National University of Computer and Emerging Sciences   Sep 2021 - Jun 202
- Taking part in different competitions and seminars such as predictive analysis competition, phishing training and more

Freelancing   Jan 2023
- Worked with an international IT client as a copywriter to write pages for their website on the IT services they are providing like BCDR, IT consultation services and such.

Projects

Job Delta
- A DBMS based freelancing website to enhance local freelancing community.
- Actively uses SQL, ASP.NET, C#, HTML, JSS, CSS, GIT and more to implement the following functionality.
- Implemented all main features like account creation, client job posting, freelance proposal submission and acceptance, deliverable submission download and much more.

HunterXFish
- An Assembly language (8088 architecture) project that is implemented using sub-routines, string instructions, DOS/BIOS services, interrupts, and multi-tasking.
- The primary focus was on building visual elements and interactivity in the game as well as implementing multi-tasking.

Tic-Tac-Toe Plus
- Although a typical project, to make it unique I implemented some interesting features such as player vs computer a hat-trick counter a timer and much more.

Other interesting projects I have worked on such as traffic light management system, memory management system, library management system and much more are available on my GitHub.

Education

FAST NUCES   Sep 2021 - Jun 2025 (expected)
Bachelor of Science, Computer Science

Technical Skills

Programming Languages   **Other**
JavaScript, C++, C, SQL, Python, Assembly x86   GIT, HTML, CSS, Asp.net and more
